April 25, 2022

Dear Valued Customer,

This device currently has two IBIS model options due to a recent revision change. Since existing customers may have previous device revisions, we are offering both IBIS models at this time.

For new order please use the ut8q512k32e_RevG model. If you already have parts, please refer to the device lid marking and reference the marking "QS04x" where x is the revision of the assembly. If your device revision is "G" then use the ut8q512k32e_RevG model. For any other revision marking please use the ut8q512k32e model.

Sincerely,

Mike Leslie
